

## Black Pepper Essential Oil

### DESCRIPTION

Black pepper oil is extracted from the unripe dried red berry of a black pepper plant using steam distillation. When this berry is dried it is referred to as a peppercorn. The aroma of black pepper essential oil is reminiscent of ground peppercorns we often use in the kitchen, however it doesn't make you sneeze like ground pepper does. Black pepper oil has a stimulating and warming effect. It can be used in aromatherapy to help stimulate circulation as well as help soothe sore muscles. It is also often used to increase alertness.

### DETAILS

Origin: India
