

Sesame Oil

DESCRIPTION

Sesame oil is thicker and has more of an aroma than most carrier oils. It contains minerals & vitamins that are easily absorbed by the skin. It is very popular in massage when blended with other carrier oils.

DETAILS

Botanical Name: *Sesamum indicum*

Extraction Method: Cold Pressed

Sesame oil has a more pronounced seed aroma that may be stronger than other scents.

THERAPEUTIC PROPERTIES

Sesame oil has been used as a natural sunscreen due to its ability to moisturize and retain dermal fluids.
