

Tea Tree Essential Oil

DESCRIPTION

Tea Tree oil, which is also known as melaleuca oil, has been claimed to have a wide variety of medicinal properties. However, it is toxic when taken by mouth. It is often used topically mixed with carrier oil, such as coconut or avocado oils, and may help fight dandruff, lice, and herpes as well as help with mild skin infections. Tea tree oil is most popularly known for its anti-fungal properties. It also makes a wonderful insect repellent from fleas, ticks, and mosquitoes, and is often used in homemade cleaning solutions.

DETAILS
